Experience

2024 – Present Valencia/Philippines

Product & System Designer  
(self-initiated)

Tulog

- Self-initiated logistics control system built from real World Central Kitchen field operations in Valencia and the Philippines, grounded in fieldwork alongside WCK drivers and coordination teams.
- Modeled complex operations (routes, fleet, capacity, ETAs) into clear digital workflows; built interactive prototypes in React / Three.js.
- Helped cut around 4 days off a 3-week field activation by streamlining routing and coordination through the tool.

May – Jun 2026 Remote

Product Designer (Contract)

ODEI

- Two-month engagement to design one feature end to end: grouped budgets with tracked modifications, for contractors managing live construction costs.
- Designed the flows for creating budget groups and for recording changes to price, material, quantity and product type, so teams could read the current budget and what changed without leaving the view.
- Resolved business-rule edge cases directly with the CEO and engineering in Figma review threads, covering duplication rules, automatic coding and mixed resource units.

2024 – Present Valencia

Product Designer (Freelance)

DinAI

- Client-facing product and brand design; lead client meetings, presentations and design proposals.
- Use AI tools (Claude, Claude Code) to explore concepts and iterate faster.

Dec 2022 – Apr 2024 Valencia

UX/UI Designer

Idrica

- Led UX/UI for Plant Analytics, a data-heavy operational platform (alarms, maps, dense technical data) for wastewater engineers.
- Worked cross-functionally with PMs and dev team; field research included engineer interviews and on-site plant visits.
- Contributed reusable UI patterns toward design-system consistency.

2021 – 2025 Remote

Visual & Digital Designer

Knowadays

- Design production and digital redesign for a global online learning platform (proofreading, editing, writing), across web, email, social and editorial.

Education

Coursera

Foundations of User  
Experience (UX) Design

2022

ESAT

ID3 Postgrad in Design and  
Web development

2021 – 2022

CEU San Pablo
